

AP1

ADVANCE YOUR GAME WITH THE ALL NEW AP1.

Advance performance, multi-material AP1 irons provide more forgiveness with solid feel and improved looks for the aspiring to skilled golfer.

INCREASED FORGIVENESS through an advanced technology, multi-material, high MOI design featuring a precise stainless steel body and high density tungsten sole weight

HIGHER BALL SPEED on miss-hits for improved distance control

MORE FORGIVING LONG IRONS with a 4% increase in moment of inertia (MOI)

TRADITIONAL SHORT IRONS through a progressively reduced blade length

IMPROVED SOLID FEEL from the high MOI design and tuned feel cavity insert

IMPROVED APPEARANCE with a beveled topline, traditional shape and more precise address profile

DYNALITE GOLD XP steel shaft provides tour-proven mid-weight performance. Lighter weight shafts available for custom order

GRAPHITE DESIGN, TOUR AD 65I GRAPHITE SHAFT graphite shaft for stable light weight performance

AP1 TECHNOLOGY

Internal weighting utilizing higher density tungsten material distributes weight more efficiently to increase moment of inertia (MOI).

DUAL CAVITY DESIGN

Advanced, dual cavity design and enhanced perimeter weighting increase forgiveness

THIN STEEL SOLE PLATE

Thin steel sole plate for more efficient weight distribution

TUNGSTEN WEIGHT

Concentrated tungsten sole weight increases the MOI for higher ball speed on miss-hits

ELASTOMER CAVITY INSERT

Feel-tuned, integrated aluminum and elastomer cavity insert for improved sound and feel

Titleist[®]

AP2

REFINE YOUR GAME WITH THE ALL NEW AP2.

Advance performance, multi-material AP2 irons provide more playability with solid feel and improved looks for the aspiring to highly skilled golfer.

INCREASED PLAYABILITY through an advanced technology, multi-material, forged carbon steel body and high density tungsten weight design

CONSISTENT BALL SPEED and improved distance control on miss-hits from a 7% increase in moment of inertia (MOI) with no loss of workability

IMPROVED SOLID FEEL from increased MOI and the tuned feel cavity insert

PRECISE SHORT IRONS with a reduced sole width for improved turf performance

IMPROVED APPEARANCE with a new squarer profile

SUPERIOR SHOT CONTROL from the small progressive offset and traditional constant blade length

DYNAMIC GOLD STEEL SHAFT provides tour-preferred feel, weight feedback and performance. Other high performance shafts available custom order

AP2 TECHNOLOGY

Internal weighting utilizing higher density tungsten material distributes weight more efficiently to increase moment of inertia (MOI).

FORGED DUAL CAVITY

Advanced, dual cavity forged design increases playability and precision

THIN STEEL CRADLE

Thin steel cradle for more efficient weight distribution

TUNGSTEN WEIGHTS

Concentrated tungsten heel and toe weights increases the MOI for better distance control

ELASTOMER CAVITY INSERT

Feel-tuned, integrated aluminum and elastomer cavity insert for improved sound and feel
